Fire Regime Condition Class
Stand Scorecard Worksheet

Landscape Project Data:

Reg Code(1): _____ Proj Code(2): _____ Proj Num(3): ____

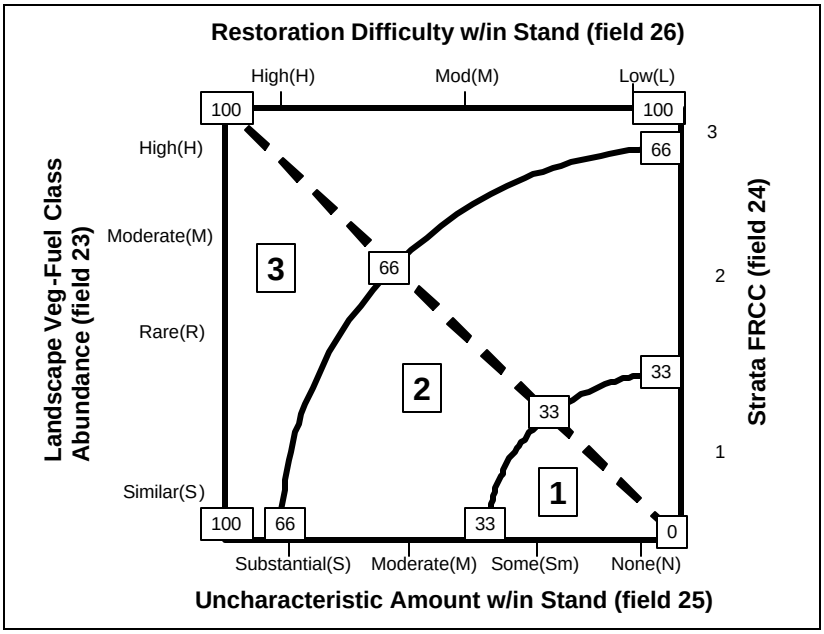
Proj Char Dt(4): ___/___/___ Landscape Method(5): Standard/Scorecard

Stand Data:

Stand number (6)	1	2	3	4	5
Examiner Name (7)					
Stand Area (8) acres/hectares (9)					
Stand Char Date (10)					
Strata BP Land Unit (11) field 25 on Standard Landscape field 19 on Landscape Scorecard					
Strata Num (12) field 21 on Standard Landscape field 15on Landscape Scorecard					
Xwalk Code 1 (14)					
Xwalk Code 2 (15)					
Stand Name (16)					
Latitude (17)					
Longitude (18)					
Datum (19)					
Photo (20)					
Photo Date (21)					
Veg-Fuel Class (22)					
VFC Abundance (23) field 81 on Standard Landscape or estimate (table 1)					
Strata FRCC (24) field 88 on Standard Landscape field 46 on Landscape Scorecard					
Uncharacteristic Amount (25) None, Some, Moderate, Substantial (table 1)					
Restoration Difficulty (26) Low, Moderate, High (table 1)					
Stand FRCC (27) from Graph 1					
Stand FRCC Departure (28) from Graph 1					

Stand Fire Regime Condition Class

Stand Fire Regime Condition Class - Graph 1(Graph 5-1 in guidebook)



Nomogram style chart for classifying the stand-small area fire regime condition class (FRCC) and determining FRCC departure. Use the chart by connecting the left and right variables with a single line using the "sum's" from table 1 below (5-1 in guidebook). Then connect the bottom and top variables with a similar line. Where the two lines cross indicates the stand-small area FRCC. Determine if the intersection of the nomogram lines is closer to the Y axis (right side), center axis (diagonal from lower right to upper left), or X axis (bottom side). Each axis is marked on the graph with the class breaks (0, 33, 66, and 100). Based on the point where your nomograms lines intersect estimate the value between the class breaks rounded off to the nearest 5 or 10 percent.

Stand Fire Regime Condition Class Scorecard for Graph Inputs Table 1(Table 5-1 in guidebook)

Graph Axis	Indicator Variable Definition	Stand Rating	1	2	3	4	5
Field 23 - Landscape Vegetation-Fuel Class Abundance (circle the rating)	≤ – 25% difference from reference central tendency	Rare (R)					
	-24% to 24% of reference central tendency	Similar (S)					
	+ 25% to 74% difference from reference central tendency	Mod (M)					
	≥ 75% difference from reference central tendency or uncharacteristic	High (H)					
Field 24—Strata FRCC	From field 46 on Landscape Scorecard, field 88 on Standard Landscape	1, 2, 3					
Field 25—Uncharacteristic Amount w/in Stand	N = none; Sm = some (> 0 – 25%); M = moderate (25-45%); S = substantial (> 45%)	N, Sm, M, S					
Field 26 - Restoration Difficulty within Stand (identify the primary characteristic OR uncharacteristic vegetation-fuel class of concern for restoration; circle the appropriate rating – L = low; M = moderate; H = high); modify based on guidebook guidelines and your experience to select between L, M, and H. Use the highest rating for final input (e.g. 3 L's and 1 H = enter H).	Characteristic types	L, M, H					
	Uncharacteristic types:						
	• Invasive Plants	L, M, H					
	• Timber Harvest	L, M, H					
	• Grazing	L, M, H					
	• Fuel/Succession/Lack Fire Effects	L, M, H					
	• Post-Fire Effects	L, M, H					
	• Soil/Hydrology	L, M, H					
	• Insects/Disease	L, M, H					
	• Cultural	L, M, H					
	• Other uncharacteristic types – define –	L, M, H
